IBAM 2024

International Buttocks Anatomy Masterclass

I am very excited to present the International Buttocks Anatomy Masterclass.

This unique educational event combines theoretical knowledge with hands-on practical experience, offering a deep dive into the latest advancements in the field of gluteal aesthetics. Our international faculty of experts will guide you through a transformative learning experience, providing a solid foundation for mastering the art of gluteal enhancement.

On the first day of the masterclass, participants will delve into the theoretical aspects of gluteal anatomy, understanding the intricate structures and principles that underpin the art of gluteal aesthetics. Our renowned experts will cover a range of topics, including gluteal anatomy, patient assessment, aesthetic principles and procedure selection.

The second day of the masterclass offers participants a unique opportunity for hands-on experience, combining theoretical knowledge with practical application. Each group of three participants will work on a cadaver specimen, specially prepared with injected arteries and veins, under the guidance of our international faculty. This practical session will include cadaver dissection, injection techniques, surgical procedures and complication management.

Join us in this transformative educational journey and unlock the secrets to mastering the art of gluteal aesthetics.
